

# BLUETOOTH COMPATIBILITY WITH WORKOUT DEVICES & DISCOVER CONSOLES

Enhanced Bluetooth® technology provides effortless and cordless connection to Discover SE, SI-TV and SI Tablet Consoles to enhance the exerciser experience.

Life Fitness focused on Bluetooth integration in order to stay ahead of the incredibly fast pace of technology and make it easier for exercisers to connect to an engaging workout.

## WORKOUT TRACKING

Apple™ and Android® devices connect with consoles via QR codes to login and transfer workout data to the Lfconnect™ app. Tracking results helps exercisers progress and stay motivated.

## ENTERTAINMENT

Wireless headphones allow exercisers to get the most out of the entertainment options offered by Discover consoles. They also eliminate the possibility of headphones being accidentally pulled out of the console jack or the exerciser's ears during a workout.

## HEART RATE MONITORING

Chest straps and wrist monitors help exercisers measure workout intensity. Bluetooth compatible heart rate monitors transmit extremely accurate information, which appears on the console display.
